

Does your child have a disability that affects attention and learning as their primary diagnosis?

Are they under 18?

Please join us for a listening session to help shape two wellness programs. The purpose of this research is to help us develop programs to support the wellbeing of parents and caregivers like you!

Research participation involves:

- 60-90 minute listening session
- Completing a survey before the listening session
- In-person or virtual participation (based on your preference).

Participants will receive a \$50 gift card as a token of gratitude for their time.

Listening sessions are offered in English and Spanish
